

Bristol and District Table Tennis Association

End of Season Statistical Report

Season 2005 - 2006

Prepared by John Reynolds (Registration Secretary)

Bristol & District Table Tennis Association

Annual Report for the Season 2005 / 2006

My fifth term as registration Secretary has now drawn to a close and with it the end of the first season with twelve team divisions. Although again there was a large number of matches outstanding at the end of the season proper the availability of free cup weeks did reduce the total from other seasons. Albeit some of the outstanding results had to be obtained at the expense of time and expense on phone calls.

One or two matches were obtained late by phone and the individual set scores were not recorded, so if my version of your average does not agree with your own records this may be the case. Please accept my apologies for any errors you may discover but I do my best and am always prepared to research any queries you raise DURING the season.

I make no apologies for repeating the following comments as they are still appropriate.

The accuracy of the completion of score sheets still leaves a lot to be desired. The same common errors continue.

- a. Game scores not being filled in the sequence of the numbered boxes, which confuse the assessment of the away player's wins.
- b. Games not being inserted the right way round, showing a different result from the end box total
- c. Sets shown resulting in two games all, final game missing.
- d. The home team title set out at the top of the sheet reversing the order of play in the match section
- e. A large number of games being played to 10 up!!!
- f. The team titles at the top of the sheet not including the suffix. When a club has more than one team in the division this can make more work for me, especially if their opponents also have more than one team in that division.
- g. A number of players are indicated as "Mike" "Dave" etc. I do know most of the players but occasionally I have to cross check.
- h. There are still teams who do not know how to deal with the result when both side have less than three players.
- i. Occasionally the side totals reverse the sets results from the boxes

In isolation these do not amount to much of a problem but when you have several each week it does become an annoyance especially when I have to make several phone calls to obtain clarification.

I trust that my hours toiling over a hot computer have not been wasted and that you will find the statistics of interest. I apologise for any anomalies, it is difficult to maintain finite accuracy when they are prepared piecemeal over the season and pulled together in a frantic final rush.

There was a small increase in the number of clubs participating in the league this season. The number of clubs increased by one to 22 but the number of teams remained the same at 102. The number of playing members dropped from 425 to 415 but I believe we still remain the largest league in the country and this excludes a thriving Junior League.

No team completed the season with a hundred percent record but Failand E went through undefeated., drawing three.

My thanks go to John Hodson for checking and transferring my data to the website.
