

Cup Secretary's Report

This years handicap cup was played to a successful conclusion with St Lawrence A defeating Blackwater A in the final by a margin of 6-2.

There was as usual some complaints about peoples handicap being too high or low, however most games were competitive with a small margin deciding the outcome. One common theme that was mentioned was that the players who had the highest handicap had to win very few points to win the game.

I think we need to come up with a number that ensures a player must win a minimum amount of points to win a game either by stating a maximum handicap and adjusting all handicaps below or extending the game past 21 to achieve the desired effect.

I was also concerned that less than half the teams in the league entered the competition, covid may have been a factor in that but hopefully this year we will be back to normal and will see a better entry.
