IMPORTANT - GAMES NOT POINTS

The new format is based on total games won, not on points or set wins, so each game counts.

Fill in your team details as normal adding individual handicap in H'Cap column.

Calculate handicap for each set – round the difference in H'Cap of the 2 players in the set up to a multiple of 4 & divide by 4. This is the start the weaker player gets in each game. Record this start next to the weaker player's name (ie +5) capped at max of +8

Play all 4 games as normal up to 11, remembering to start the weaker player on their positive H'Cap in each game. The games won by both players are then entered in Total games column and added to the cumulative games column.

At the end of the 9th set, the team with the most games wins. If tied, the winning team will be the team awarded most handicap points.

In doubles, the pairs H'caps are added together, divided by 2 and rounded up to a whole number. Then calculated as above.

The winning team to forward the scorecard to the Match Secretary.
