Notes on using the chart

To determine the starting score, take the lowest letter of the two and note it on the left hand vertical column. Run across horizontally to meet the column corresponding to the second letter, where the starting score will be found.

Examples: D plays M: lower letter is M, score corresponding to D is 14. Therefore M starts at +14 to 21. Service changes after one point at 15-0 or 14-1.

M+5 plays A: Game is played to 21+5 = 26 points, M starts at 17 + 5 =22.

A-5 plays A-2: Game played to 26 points, A-2 starts at +3

A-10 plays M+5: Game is played to 21+ 10+ 5 = 36 points, M+5 needs 4 points per game.

Service changes every 5 points, starting from zero.
